

Company Performance Report

Helps management and investor relations department keep an eye on trading activity

Oslo Børs Company Performance Report gives corporate investor relations managers a complete insight into the trading activity of the company's listed securities, such as share liquidity key figures, historical prices, trade volumes and broker activity. The report includes both table and graphical presentations.

Company Performance Report Monthly

The monthly report provides daily trade and liquidity information for the previous and current year for a listed company.

- Key figures for share liquidity, historical prices and trade volumes
- Quick overview of the most used liquidity data, graphs, yearly turnover, daily average turnover and broker market shares
- Delivered on the first trading day of each month

Company Performance Report Daily

The report provides an insight into the volume of trades on a daily basis and the largest buyers and sellers.

- Detailed data such as key figures on share liquidity and trade details
- Complete trade log for that trading day
- Broker ranking showing the top 15 buyers and sellers
- Delivered in the evening of each trading day
- Subscribers to the daily report also receive the monthly reports

www.oslobors.no, click Products and services

“ When our company in September 2009 announced a \$800m global agreement with Bayer for development and commercialisation of Alpharadin, our daily share trading volume rose ten fold to more than 2 million. Subscribing to Company Performance Report Daily has been a good tool for Algeta to keep track of trading and liquidity in our stock.

Øystein Soug
Chief Financial Officer
Algeta ASA
