

Link to stock exchange announcements on NewsWeb.

Oslo Børs offers companies to use a link to NewsWeb in order to specify announcement categories that are to be made available through the companies' web site.

The announcement categories are:

- Stock exchange announcements over the last 36 months
- Trades reported by primary insiders over the last 12 months
- Flagging announcements over the last 12 months

The following link (URL adresse) must be used:

<http://www.newsweb.no/query.jsp>

Parameters which must be used in the URL:

```
symbol= Company ticker  
action= Type query 1=All announcements last 36 months, 2=primary insiders last 12  
months, 3=flagging last 12 months  
languageID= 0=Norwegian 1=English
```

An example using NHY as a ticker symbol:

- Stock exchange announcements for NHY (36 months)
<http://www.newsweb.no/query.jsp?symbol=NHY&action=1>
- Trades reported by primary insiders for NHY (12 months)
<http://www.newsweb.no/query.jsp?symbol=NHY&action=2>
- Flagging announcements for NHY (12 months)
<http://www.newsweb.no/query.jsp?symbol=NHY&action=3>

Parallel to this possibility, Newsweb is now updated with a choice of Norwegian or English language. This is user initiated and the choice provides the opportunity to change between Norwegian and English text as headlines in the menu as well as in the descriptions of announcement categories.
