

Nordic Equity Indices VINX

The VINX indices are produced in cooperation with Nasdaq OMX with index constituents from all of the Nordic stock exchanges in Copenhagen, Helsinki, Oslo, Reykjavik and Stockholm

The VINX indices are based on the Global Industry Classification Standard® (GICS) developed by MSCI Barra and Standard & Poor's. The main indices are:

- VINX30 (Tradeable)
- VINX Benchmark
- VINX Benchmark Cap
- VINX (All-share)

Sector indices are level 1 and level 2 in the GICS model.

All indices are calculated in EUR, SEK, NOK, ISK DKK with exception from VINX30 which is only calculated in EUR. All indices are also calculated as total return, net total return and price indices, with exception from VINX30 which is only calculated as a price index.

For more detailed information regarding main and sector indices, please see "Nordic Equity Indices – Rules" on: www.oslobors.no/ob/vinx_nordicequityindices

Index Weights

The daily index weight files include the following information for all official indices:
