

Document Feed

The Document Feed distributes original financial reports and prospectuses for all issuers of equities and fixed income listed on the marketplaces managed by Oslo Børs.

The Document Feed includes delivery of annual reports, interim reports, and prospectuses for bonds and equities.

When the first document of the day is distributed, an index file is created and distributed to the client's FTP server. The index file is updated incrementally during the day, and contains information about the distributed documents. The purpose of the file is to inform the client about new files, as well as amended, replaced and deleted files.

Delivery and availability

The documents are delivered in pdf format immediately after they have been made public. The documents are delivered by means of FTP (Get).
