

Market Information End of Day

The Market Information End of Day product is a daily dump of prices and volumes for all securities listed on Oslo Børs, Oslo Axess and Oslo Alternative Bond Market

Product overview

Market Information End of Day is detailed information on trading in listed securities on the marketplaces managed by Oslo Børs. The information is consolidated from, and presented in a transparent way across, the different trading systems. For each security the product gives aggregated price and trading information such as:

- Open
- Close
- High
- Low
- Volume

The following security types are included:

- Shares
- Subscription rights
- Equity certificates
- Warrants
- ETFs
- Bonds
- Certificates
- Options
- Futures
- Forwards
- Equity indices
- Bond indices
- Currency

Delivery and availability

The Market Information End of Day product is file based and delivered by means of FTP (Get) or email. The files are distributed each trading day after market close.

Technical references

Technical specifications for each of the file types are available on www.oslobors.no/ob/endofday

Subscription

The Market Information End of Day product is subject to an annual technical subscription fee. The product does not require end-user access control.
