

Market Information 15 min delayed

The Market Information 15 min delayed product is a file based feed of prices and volumes for all securities listed on Oslo Børs, Oslo Axess and Oslo Alternative Bond Market

Product overview

Market Information 15 min delayed gives information in respect of which 15 minutes or more has elapsed from the time the information was first transmitted to the market. The information is consolidated from, and presented in a transparent way across, the different trading systems. For each security the product gives aggregated price and trading information such as:

- Open
- Close
- High
- Low
- Volume
- News messages

The following security types are included:

- Shares
- Subscription rights
- Equity certificates
- Warrants
- ETFs
- Bonds
- Certificates
- Options
- Futures
- Forwards
- Equity indices
- Bond indices
- Currency

Delivery and availability

The Market Information 15 min delayed product is file based and delivered by means of FTP (Get). The files are distributed every 15 minutes throughout the trading day.

Technical references

Technical specifications for each of the file types are available on www.oslobors.no/ob/md_filebased

Subscription

The Market Information 15 min delayed product is subject to an annual licence fee. The product does not require end-user access control.
